

## RIGID FRAME STRUCTURES

**WARWICK STRUCTURES GROUP** manufactures pre-engineered buildings and offers superior design flexibility with a focus on functionality and efficiency. From heavy industrial and high-end commercial structures to basic storage projects, our pre-engineered buildings are fabricated to precisely achieve each client's unique requirements. Our team excels at providing turnkey, value engineered solutions – on time and on budget - for any application.

### FEATURES

- Design consultation, value engineering, manufacturing, site installation, and after-sales service
- Proficient in providing structures with large clear spans over 106 meters (350') and height clearances greater than 30 meters (100')
- The manufacturing process is strictly regulated and audited by several outside agencies including the Canadian Welding Bureau and the Canadian Standards Association
  - CSA A660 Certification of Manufacturers of Steel Building Systems
  - CSA W47.1 Certification of Companies for Fusion Welding of Steel

### VALUE-ADDED BENEFITS

#### Collaboration is Key

We collaborate with our clients to customize each solution

#### Turnkey Solutions

We manufacture and provide turnkey solutions on all building components, including: columns, trusses, purlins, cladding and associated accessories

#### Value Engineered

All buildings are value engineered and designed for optimal constructibility

#### Efficient

Our in-house team of professionals facilitate an economical and streamlined manufacturing process

#### Quality & Value

Our proven efficiencies ensure consistent quality and reliable craftsmanship every step of the way

#### Size Matters

Our 20 acre modular construction yard in Calgary, Alberta allows for storage capacity if you need to delay delivery
